

Click Seal Wire Security Seal (AT5006)

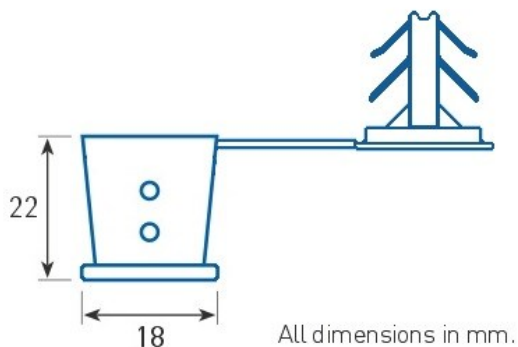

- Meter sealing
- Measuring machines
- Gaming machines
- Security boxes

The Click Seal is an easy applicable seal for providing tamper evidence on all types of meters. This seal has a clear body with 2 holes to thread the wire through. The seal is then clicked into place providing tamper-evident security.

Sealing wire can be stainless, galvanised or plastic coated, providing protection against environmental conditions.

Standard seal is supplied with 200mm wire lengths, custom wire lengths available. Pre-assembly is not possible

Customisation Options

- Laser printing
- Logos, text and numbering available
