

Twist Seal Wire Security Seal (AT5004)

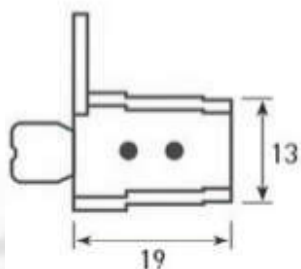

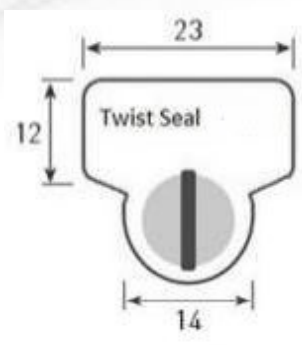

- Meter sealing
- Measuring machines
- Security boxes
- Gaming machines

The Twist Seal is an easy applicable seal for providing tamper evidence on all types of meters. This seal has a clear body with a rotating locking mechanism. Wire is threaded into the barrel and the seal is twisted until tight enough.

Sealing wire can be stainless, galvanised or plastic coated, providing protection against environmental conditions.

Standard seal is supplied with 200mm wire lengths, custom wire lengths available.

All Dimensions in mm

Customisation Options

- Laser printing
- Logos, text, number, and barcoding available
